## WINE EXPERIENCES

## THE WINE LANDSCAPES

The landscapes of Madrid's wines transport us to a past of farming traditions because today's landscape is modelled by and results from the work of the farmers who settled on its lands.

The vines they cultivated, and which constituted their livelihood, were the witnesses of important historical events and also of the anonymous lives of our forebears, who gradually meshed together the most deep-rooted culture and traditions of our Madrid region.

In the Arganda area we have one of the best examples of a cultural landscape in a unique enclave, Aranjuez, with a rural architecture that resulted from the interaction between man and nature. Irrigated by the rivers Tajuña and Henares, this is a land of market gardens and farmlands that filled the larder of the court of the Spanish Monarchs in the 18th and 19th centuries.

Also of important landscape value is the Navalcarnero area, a land of meadows and floodplains, with its characteristic flatlands slashed from north to south by the river Guadarrama.

In complete contrast is the area of San Martín de Valdeiglesias, a more rugged and mountainous terrain due to the influence of the nearby Central System. Meadowlands, mountains and pine woods define a landscape of great natural value.

And let's not forget to visit the villages –which grew over time with the vines and the wealth they generated— and their characteristic squares, churches, monuments, wash houses, caves, underground wine cellars... These communities are undoubtedly the ideal place in which to enjoy Madrid's varied cuisine, the ideal complement and pairing for our Vinos de Madrid wines.
